Dear Sir:

In response to your valued inquiry for Grafted Nut Trees, I am enclosing my Price List and other information regarding these trees.

Grafted Black Walnut trees are among our fastest growers, as well as the youngest to come into bearing among edible tree crops. ~~any~~ many varieties start to bear as early as the second and third year after planting. It is always best to plant several varieties for good pollination. These trees are among our hardiest trees and are adaptable to a very wide range. Only grafted and tested Carpathian (English Walnut) should be ordered. Many of those offered by different parties at a cheaper price are only seedlings and therefore is a gamble and will often result in disappointment.

These named improved varieties have been discovered by different people in different parts of the United States and have proved to have outstanding merits as compared with our native or wild ones. They are young bearing, excellent crackers, having high kernel percentage with sweet and light colored kernels of superior quality. They are also among our longest lived trees. They produce an annual crop of one of man's best foods, sealed in a tight package that never spoils and with never a worm in the nuts.

Value of nut meats in the diet as given by Dr. John Harvey Kellogg, of Battle Creek, Michigan are as follows: 1# of Black Walnut meats is equal to 4# of Beef; 6 $\frac{1}{2}$ # Beef Ribs; 5 $\frac{1}{2}$ # Veal; 4 $\frac{1}{2}$ # Mutton; 3# Ham; 10 Chicken Broilers; 13 $\frac{1}{2}$ # Oysters; 5# Eggs and 9 $\frac{1}{2}$ # Milk.

My Nut Trees are propagated, sold, carefully hand dug, and packed for shipment by myself. They have a strong root system and have proved to transplant very satisfactorily. I am very particular in obtaining my graft wood, to be sure they are true to name.

Nut Tree Nurseries are few and the demand for trees is growing by leaps and bounds, and in the past I have shipped Nut Trees to all parts of the United States, without ONE complaint, but considerable repeat orders and complimentary letters, as shown on the reverse side.

My suggestion is that if you are in the market for Nut Trees, get your order booked as soon as possible while the varieties and sizes are still to be had. Later you will have less to choose from, as well as completely sold out, resulting in one year's time lost, which will never return.

Yours very truly,

BERHOW NURSERIES

COMPLIMENTARY
LETTERS

Berhow Nurseries
Huxley, Iowa

Dear Sir:

I received the nut trees in first class condition, and they are fine. You furnish much better root system on nut trees than I have seen anywhere else. I expect to order more this fall.

Very truly yours,

G. W. Nademan - - Washington

Mr. S. Berhow
Berhow Nurseries
Huxley, Iowa

Sirs:

I have purchased about 24 nut trees the past three years and from the appearance of your stock would say these trees are the best of the lot. I am more than pleased with them. Thank you for your courtesy and consideration.

Yours truly,

Alfred L. Barlow - - - Michigan

Berhow Nurseries
Huxley, Iowa
Dear Sir:

I wish to thank you for the nice nut trees you sent, also the care with which they were dug. There were no broken roots.

Yours truly,

Dan Edelman - - - Kansas

Berhow Nurseries
Huxley, Iowa
Dear Mr. Berhow:

I want to thank you for the fine stock and the good packing, I am sure I will have a 100% stand this fall.

Yours truly,

W m. L. King - - Northern Idaho

Berhow Nurseries
Huxley, Iowa
Dear Sir:

The two Black Walnut trees I received from you last spring arrived in fine shape, and made a fine growth.

Truly yours,

Harry Engstrom - - Minnesota

C A R P A T H I A N (ENGLISH WALNUT)

The Carpathian English Walnut was discovered many years ago by a missionary Rev. Paul Crath in the Carpathian mountains in North Poland. He sent large numbers of seed nuts from the best strains to the United States, which were distributed through the Wisconsin Horticultural Society.

These nuts were planted at many places and have come into bearing and have been tested as to hardiness, fruitfulness and quality.

The best ones from these tests have been propagated by Nurserymen by grafting them on black walnut stocks, which makes the best trees and are the only varieties that should be bought and planted, as these are the true reproducers of the best selected strains.

There are parties selling Carpathian trees at a cheaper price produced only by planting seed nuts (known as seedlings). Seedlings do not reproduce the parent and will be inferior and most likely result in a disappointment.

The grafted and selected strains I have propagated and tested have proven practically as hardy as the black walnut and have proven to be good regular bearers of very high quality nuts. The trees are rapid growers, young bearers and has a light gray smooth bark.

Thomas.
N-Lat. 40.05 = 19-per-Lb.
Disc-1881-Pa.

The first black walnut discovered and named having outstanding merits. Having proven adapted to a wide range. Generally considered the nations yard stick, with which to measure the value of other varieties particularly new ones. Tree has up right habit of growth. Blooms right for pollination with OHIO and MYERS. Good huller and Cracker. Heavy and Light beater on alternate years. The best known, and has been popular since its discovery. 2^d degree in hardiness. Season here about Sept-28. Score 80.07 = Kernel 78.42% = Cracking score 88.73

Krouse.
N-Lat-42.05 = 23-per-Lb
Disc-1940-Iowa.

A new variety that Looks Like it may become one of our best, an unusual pollen producer, may prove valuable as a pollinizer. Won 2^d new class 1942 Iowa Contest, and again 2^d standard class 1946 Iowa Contest. Score 97.40 = Kernel 77% = Quarters 97% 1st degree in hardiness. O.K. for Northern planting. Nut Large, splendid cracker. Season about Oct 5 Well worthy of a trial in any planting discovered by Joe Grumley, Toddville, Linn, County, Iowa owner. Russell Krouse, Toddville, Linn, County Iowa on who's farm original tree grows

Blair
N-Lat-41.06 = 22-per-Lb
Disc-1944-Nebr.

A good Looking new variety coming from Nebr Score. 94.3 = Kernel 75.1% = cracking score 100 = Quarters 94% = promising and should make good. Discovered by Earl G. Maxwell, State agri College Lincoln, Neb. owner- parent tree, prentis Smith, Blair, Washington, County, Nebr.

Ottawa
N-Lat-40.30 = 30-per-Lb
Disc-1941-Ohio.

Here is a seedling of Tritten, produced by Sylvester Shessler, Genoa, Ottawa, county, Ohio. here is new nut that really Looks Like it will give an account of its self. It is free of shell voids Thin husk, clean huller. always matures its nuts at Genoa, Ohio. Season sept 15 there. Score 93.04 Kernel 76.7% = Cracking score 97.07 = Quarters 92% I don't think you can go wrong on this one.

Shepard.
N-Lat. 42.45 = 24-per-Lb
Disc-1947-Iowa.

Grown, and produced by Mrs Ben Shepard. Shell Rock, Butler, county, Iowa. Present owner Tom Bandfield, Shell Rock, Iowa. This new variety won 3^d prize in new class. in The 1946 Iowa nut contest score 81.68 = Kernel 78.12% = Cracking score 100 = Quarters 88.88% Season Sept 25. 1st degree in hardiness. Nut almost free of shell voids. Surely a variety for far north.
